

## HF EWT Manual

1. You need to have active [EWT subscription](#) (5\$/3days or 20\$/month paid in BitCoins). You can use [Paxful](#), [CoinBase](#) or similar services to get BitCoins via PayPal or credit card. You can follow [EWT Guides](#)
2. Launch EWT (*firefox.exe*) as Administrator (right-click the file and choose the option)
3. Input your EWT username and password. In EWT menu select “*Safe – Limited hacks*” mode. Press “*Save Config*” to save the settings. Then click “*Attach to WoW*”. On the first launch, you will need to browse to World of Warcraft folder and select “*Wow.exe*” in either *\_classic\_* or *\_retial\_* folder accordingly

PSyGZ6KUJQ

4. The game will launch automatically and you will see EWT message once it is successfully loaded. Click “*OK*” to close it or wait until it closes itself along with EWT menu window

5. Login to your World of Warcraft account now. Once in world, create and run the macro:

BfA (Retail):	<code>/run LoadScriptHash("EWTFHYQgS3IFtRxQy8YMWTn0g")</code>
Classic	<code>/run LoadScriptHash("EWTDOVt1gNG3855yBe4rYVUYQ")</code>

to launch HF Authorization Menu in game. Do not copy the space in front of the macro!

6. Input your *www.ScriptVrit.com* login credentials (*email* and *password*) and click *LOGIN*.  
Your data will be saved for the next game session

7. Type *“/hf”* or right-click minimap HF icon to open the settings. Mouseover a setting option to read its description

8. You can add a spell by its name to given tables (write the precise spell name in the text field in your WoW Client language and press *ENTER* on the keyboard) or remove them

9. When finished browsing and tweaking settings, close the window and left-click minimap icon or type *“/hf run”* to start/stop the Bot
10. Learn to use HandsFree essential macros, see the table on the next page:

Macro command	Description
/hf	open settings window
/hf run	start/stop bot
/hf cast [conditions] spellname	use to cast a spell manually. To make a HandsFree cast macro, simply add “/hf ” to your regular one-line “/cast ...” <a href="#">World of Warcraft macro</a> . You can use HF special targets @ehealer for enemy healer or @fhealer for team healer: <i>/hf cast Divine Shield</i> <i>/hf cast [@cursor] Death and Decay</i> <i>/hf cast [@mouseover] Polymorph</i> <i>/hf cast [@ehealer] Cyclone</i> <i>/hf cast [@arena1,nomod][@arena2,mod:shift] Fear</i>
/hf aoe	change bot behavior (style): <ul style="list-style-type: none"> <li>• <i>All units</i> – hit/heal any enemy/friend if can’t interact with target</li> <li>• <i>Only target</i></li> </ul>
/hf fake	enable/disable “ <i>Smart fake</i> ” – bot attempts to humanly fake enemy kicks based on CD, range, LoS and other checks. Currently available for healers only
/hf dothealer	enable/disable attacking enemy healer(s) unless targeted
/hf hdps	start/stop healing cycle (if playing a DPS specialization) or assist DSPing (if a healer). Available for Paladin, Priest, Shaman, Monk and Druid classes
/hf burst	start/stop DPS class burst cycle
/hf shift [mode]	shift to another form. When macro used second time, it shifts you back to default shape. Available modes per class: <ul style="list-style-type: none"> <li>• Druid: <i>cat, bear, travel, balance</i></li> <li>• Shaman: <i>wolf</i></li> <li>• Warlock: <i>kick, dispel, tank, succubus, guard</i> (pet types)</li> <li>• Warrior: <i>def</i> (stance)</li> </ul> For example: <i>/hf shift bear</i> <i>/hf shift def</i>
/hf savepower	save player power (rage, runic power etc.) to reach maximum. Once at maximum, the Bot resumes using power requiring abilities
/hf trinket	remove loss of control with the most suitable to current condition ability (e.g. stun by Icebound Fortitude) or PvP trinket. You can spam the macro and be sure it will not waste your trinket unless you are under a loss of control effect at the moment
/hf next [action]	perform an action. Available commands per class: <ul style="list-style-type: none"> <li>• DPS classes: <i>kickcc</i> (save kick to counter any future crowd control spell one time), <i>kickheal</i> (save kick to counter any future healing spell one time)</li> <li>• Rogue: <i>stun</i> (save combat points to do full Kidney Shot stun on target)</li> <li>• Hunter / Demon Hunter: <i>jump</i> (cast Disengage / Vengeful Retreat forward)</li> <li>• Priest / Shaman / Mage: <i>purge</i> (spam Dispel magic / Purge / Spellsteal on target until canceled with same macro command)</li> </ul> For example: <i>/hf next kickheal</i> <i>/hf next jump</i>
